WORK EXPERIENCE

Administrator Linux Gaijin Entertainment

2022 – currently

Working in a team supporting the primary games of Gaijin: Warthunder, Enlisted. Main duties:

- Optimize costs of infrastructure;
- Regular on-call duty;
- Minimize downtime and raise user happiness.

Support L2 Specialist Yandex Cloud

2021 – 2022

There is Level 2 (Premium) support in Yandex Cloud. As part of the team was responsible for:

- Solving tricky client problems;
- Providing a full circle of support for premium clients.

DevOps engineer Rostelecom

2019 – 2021

Has worked in the streaming service "Wink" (<https://wink.ru>). Areas of responsibility:

- Stable work of production and test environments (includes monitoring and troubleshooting);
- Prepare new releases for production (stress testing, review migrations and code);
- Supporting dev teams (CI/CD integrations, internal services).

DevOps engineer Equilibrium.io

2018 – 2019

EQ is a crypto FinTech startup (EOS and ETH blockchains). Some achievements:

- Implement feature branch strategy for development based on docker swarm and Teamcity;
- Bring and support monitoring based on the Prometheus stack.

Technical Support specialist Rostelecom

2016 – 2018

The main part of the work was troubleshooting our platform and communicating with the client's managers.
